## EXPERIENCE

### Allwebcafe

Berwyn, PA

#### Web Developer (*September 2014 – July 2015*)

Work primarily in PHP. Maintained several client projects from legacy PHP and Codeignitor to ExpressionEngine and Processwire CMS. Lead developer in a multi-site survey based client project. Frontend work with Foundation and Sass. Setup dev environments with Vagrant. Performed site audits for SEO and performance gains. Migrated clients to AWS, setting up CDNs, separated database servers, adding cache, autoscaling - all resulting in major performance boosts. Setup clients in stateless server environments. Setup auto-staging and push button deployment in current CRM.

### Instamour

Philadelphia, PA

#### CTO (*February 2014 – Current*)

Built backend, API, and AWS infrastructure for mobile, web, and admin applications. Scaled Android, IOS and Web applications to 140k+ user base. Managed multiple teams for Android, IOS, Web development. API and Web is PHP and MySQL. Integrated AWS services RDS and S3.

### EZTees

Philadelphia, PA

#### Web Developer (*October 2012 – February 2014*)

Develop and maintained several branded ecommerce websites. Backend is PHP and MySQL. Reskinned website using Bootstrap. Setup custom Wordpress blogs. Refactored much of the existing code to work with a service and branding.
